

# How EnPro Industries Boosted Enrollment

## EnPro Industries

**Travis Leis**  
*Manager of Benefits*

### INDUSTRY

*Manufacturing,  
Industrial Products*

### THE STORY

EnPro Industries had a benefits administration platform that lacked user-friendliness and efficiency. They sought a modern solution that would reduce the administrative burden on their benefits team and be intuitive for their employees.

### WHY bswift

Time-saving  
Easy to Navigate  
Secure Experience

“The change to bswift from our previous vendors probably resulted in about a **50%** decrease in the amount of time our team is spending in the system.

### BY THE NUMBERS

“The employee experience was favorable. We had over **90%** participation in passive enrollment, which was just unheard of. To get that kind of participation and not have issues was a big feather in our cap”

### SECURE EXPERIENCE

“Considering all the news and information we hear about data breaches, it’s comforting for us to know that our employees feel comfortable using the system.”

### REPORTING CAPABILITIES

“The reporting tool in itself has probably reduced our time by close to **75%**...the ability to schedule reports, whether it’s on a weekly, monthly or quarterly basis, and the ability to generate On-Demand reports as we need them, has been a huge time-saver for us.”

“It’s easy to navigate and use, regardless of your educational background or your position at the organization. For us, that’s what this decision was really about: making sure we had an enhanced employee experience, and bswift has delivered.”

**easy**

### SEAMLESS INTEGRATION

“We’ve seen reduced errors in our integrations. The data is uploaded in a more timely fashion, so when a new hire enrolls, getting that information fed over to different carriers is really streamlined and transparent for them.”

“It was a big win for our employees and the feedback was very overwhelmingly positive. It makes us feel good that we made the right decision.”
